

PROFILE

A full-stack engineer with 2+ years of commercial experience building scalable products across diverse domains. Specialises in React, Next.js, and TypeScript, with hands-on experience in monorepo architecture, REST API integration, and Node.js/NestJS backends. Proven ability to deliver modular, high-performance solutions in fast-paced product teams, with a track record of mentoring junior developers and maintaining high code quality standards. Holds a BSc (Hons) in Computer Science from the University of Staffordshire (UK) and is committed to continuous learning and building software that makes a real-world impact.

EMPLOYMENT

Software Engineer	BotCalm (PVT) Ltd.	Jul 2025 - Present
- Contributed to the development of a Smart School Management System using Next.js and NestJS within a Turborepo monorepo architecture, designing scalable frontend and backend services to manage student records, attendance tracking, and school administrative workflows. - Contributed to the frontend development of a large-scale Casino Compliance System using Next.js, building modular UI components, integrating REST APIs, and implementing dashboards to support regulatory compliance and monitoring workflows. - Mentored junior developers, providing guidance on best practices in React, Next.js, enhancing team productivity and code quality.		
Associate Software Engineer	BotCalm (PVT) Ltd.	Jul 2024 - Jul 2025
- Contributed to the development of a hotel management system, focusing on optimizing functionality and enhancing user experience for seamless booking, inventory, and customer management. - Developed frontend features for a crypto gaming platform using Next.js, focusing on responsive UI, interactive components, and integration with blockchain APIs.		
Junior Software Engineer	Sphiria Digital Studio (PVT) Ltd.	Apr 2024 - Jul 2024
- Designed and developed an NFT platform website with responsive layouts and interactive animations using Framer Motion. - Contributed to the development of a customer portal, collaborating with the team to implement new features and improve usability and system functionality.		
Trainee Software Engineer	Sphiria Digital Studio (PVT) Ltd.	Jan 2024 - Apr 2024
- Improved the responsiveness and performance of a subscription-based service platform, enhancing overall user experience. - Enhanced a Custom Company Management System by implementing modules that streamlined internal workflows and operations. - Participated in code reviews and technical discussions to improve code quality and development practices.		
Intern Software Engineer	OREL IT, Maharagama	Jan 2022 - Aug 2022
- Collaborated with cross-functional teams to gather requirements and support software development initiatives. - Assisted in designing and implementing software solutions following industry best practices. - Demonstrated proficiency in problem-solving and debugging to address software issues effectively.		

EDUCATION

- **BSc (hons) Computer Science**, University of Staffordshire (UK), 2023 - 2024
- **Higher National Diploma in Software Engineering**, NIBM, 2021 - 2022
- **Diploma in Software Engineering**, NIBM, 2019 - 2020
- **Primary and Secondary Education**, Sri Chandananda Buddhist College, Kandy

PROJECTS

Blockchain Voting App - React, Near SDK, Bootstrap - [View Project](#)

- Implemented poll creation, candidate management, secure link sharing, voting, and real-time result viewing.
- Improved system functionality and user experience through iterative development.

Proshop - React, Redux, Node JS, Express JS, MongoDB - [View Project](#)

- Integrated full-featured shopping cart with PayPal & credit/debit payments.
- Implemented admin area for managing customers, products & orders.
- Enhanced user experience with product rating, review system, search, carousel, & pagination.

Crown Clothing - React, Firebase, Styled Components - [View Project](#)

- A full-stack e-commerce platform with Google & email OAuth authentication and Firestore-backed product catalog, supporting seamless user account management.
- Built a responsive, component-driven UI using Styled Components, with dynamic routing across shop categories, product pages, and user account flows.

SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind
- **Backend:** Node.js, NestJS, Express, Prisma
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase
